

STANDARD PORTA-JIB®

Reach 57" (145cm) - Boom 72" (183cm) Wt. 60 lbs. (27kg)

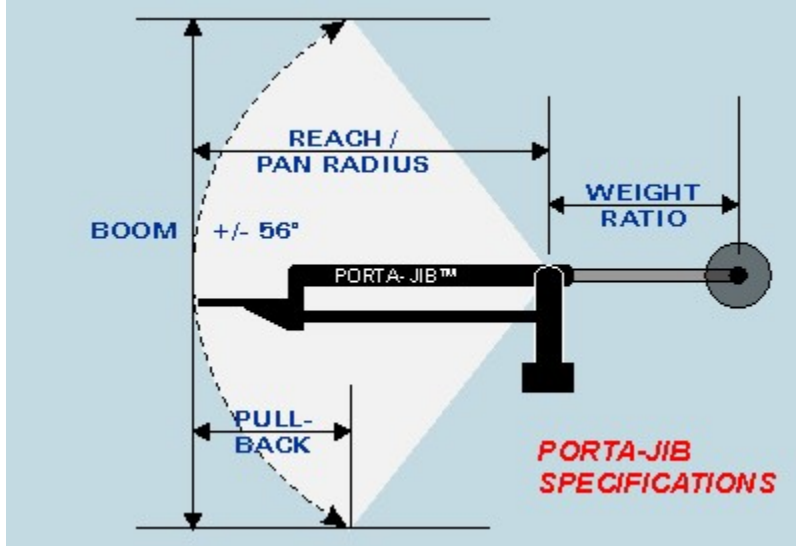

This is the most versatile of all small jibs because of its ability to interface with a variety of professional fluid heads and tripods and carry up to 100 lbs. of front end camera/fluid head weight. It future-proofs your investment since it can accommodate small cameras with 100mm fluid heads, as well as heavily accessorized cameras requiring 150mm or Mitchell based fluid heads.

It assembles in less than 5 minutes. No tools required. All parts are machined aluminum and stainless steel. Boom lock, pan lock, [Vector Balancing Bar](#), and Fine Tuning Weight are included. However, the Porta-Jib Custom Case, Front Inserts, Bases, and Counterweights are not included. See accessory pricing below.
